WOOD BURNING STOVES

eVolution woodburning stoves

The eVolution wood burning stove range incorporates contemporary design with Broseley Fires latest stove and boiler technology. All the eVolution stoves are highly efficient and clean burning and with the range of stoves offering the choice of freestanding, inset or boiler stove there is a model to suit every home.

Woodburning Boilers for Sealed Heating Systems

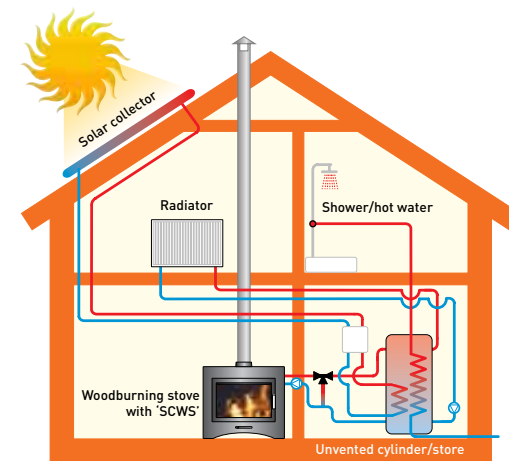

The eVolution boiler stoves feature the Broseley 'Safety Cold Water System' which is a system in its simplest of terms allows you to connect the woodburning boilers directly to a sealed heating system without the need for extra feed and expansion tanks.

Benefits of the 'Safety Cold Water System'

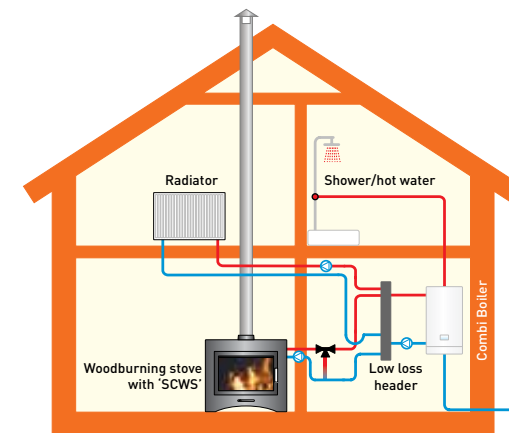

The system allows easy integration of multiple heating sources on one heating system. This means you can connect the eVolution woodburning boilers directly in with gas or oil boilers already on a sealed system without the need to run a traditional open vented system with additional feed and expansion tanks that take up space. It also makes integration with renewable energy sources such as solar thermal or ground/air source heat pumps with the eVolution range woodburning boiler easier through a thermal store.

WOOD BURNING STOVES

Typical Installations

Example of Solar System

Example of Combi Boiler System

eVolution Boiler Stove

Output to Room 10kW

Output to Water 16kW

3

eVolution 8 Boiler Stove

Output to Room 3kW

Output to Water 8kW

4

eVolution 5 Stove

Output to Room 5 kW

eVolution 5 Stove with Log Store

Output to Room 5 kW

eVolution 4 Inset Stove

7

Output to Room 4 kW

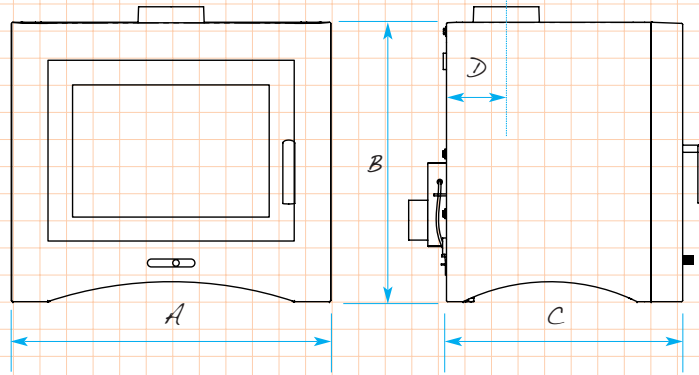

8

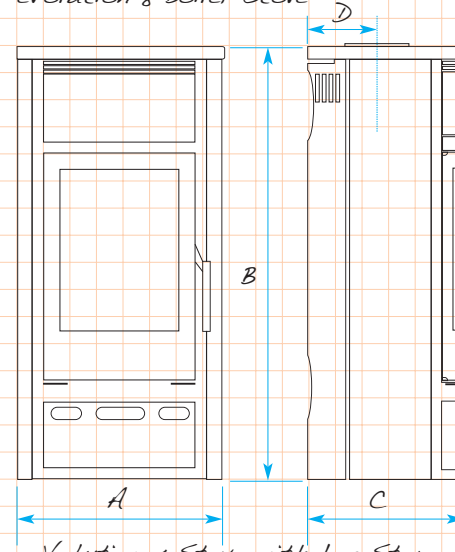

Measurements
